Capability Statement

2026 · v1

COMPANY OVERVIEW

Kanban Studios F.Z.E. is an Abu Dhabi–based technology company that designs and develops practical AI solutions, custom software, workflow automation, dashboards, and internal business platforms. We help organisations replace disconnected spreadsheets, repetitive manual work, scattered documents, and fragmented communication with integrated systems designed around their actual operations. Our approach combines artificial intelligence, software engineering, product design, automation, and human oversight to create systems that are usable, accountable, and ready for real business environments.

AI-assisted. | Human-reviewed. | Built to not fail.

CORE CAPABILITIES

Custom AI Software
Bespoke AI web apps, portals and decision-support tools.

Agentic AI Systems
Multi-agent workflows, orchestration and human approvals.

Workflow Automation
Document workflows, RPA and approval routing.

Dashboards & Data
Executive dashboards, KPIs and multi-source reporting.

Vision Intelligence
Detection, inspection and site monitoring with computer vision.

Predictive Analytics
Forecasting, risk scoring and planning support.

Conversational AI
Assistants for customers, staff and knowledge access.

Systems Integration
APIs, Google Workspace, databases and business tools.

Also includes CRM & business systems, document intelligence, custom internal tools, cloud deployment, product design, workshops, and managed support.

KEY DIFFERENTIATORS

- Custom-built, not one-size-fits-all
- AI + workflow + software, together
- Built around real operations
- Human-in-the-loop where accountability matters
- Arabic-English capability where required
- Secure and integration-ready
- Designed, reviewed and supported in the UAE

INDUSTRIES WE SERVE

Energy & Utilities | Oil & Gas | Construction | Manufacturing | Logistics | Healthcare | Education | Government-related | Retail & e-commerce | Facilities

ENGAGEMENT MODELS

AI workflow checks, discovery & technical assessment, MVP development, full production implementation, automation sprints, workshops, and monthly software support.

DELIVERY APPROACH

01 Discover
Map workflows, users, systems, data and outcomes

→

02 Define & Design
Scope requirements, architecture, user flows and prototypes

→

03 Build & Review
Develop software, AI workflows, integrations and human review gates

→

04 Deploy & Support
Deploy, hand over, train and support ongoing operations

Selected capability visuals

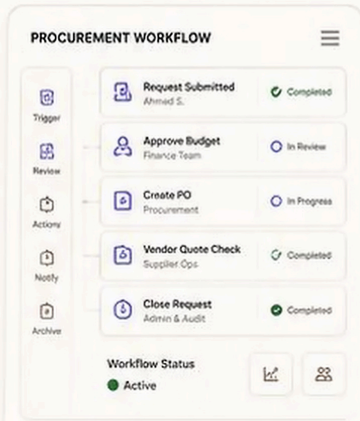

Illustrative interface concepts from our core capabilities — the kind of practical, human-reviewed systems we design and build.

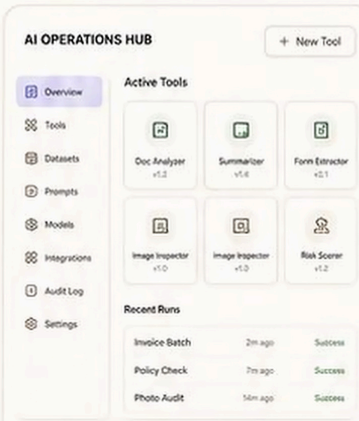

1. Predictive Analytics

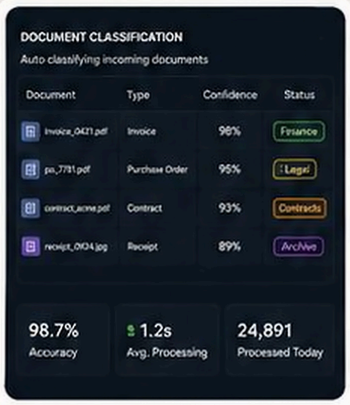

2. Vision Intelligence

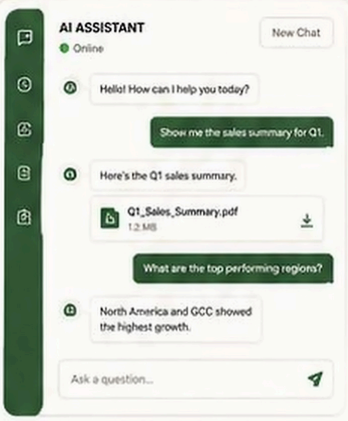

3. Process Automation

4. Custom AI Tools

5. Classification

6. Conversational AI

7. Agentic AI Systems

8. Dashboards & Data Intelligence

Representative solution areas include AI assistants, dashboards, workflow automation, camera monitoring, document intelligence, CRM & operations systems, internal portals, bilingual Arabic-English tools, and multi-agent AI workspaces.

ENGAGEMENT MODEL

PHASE 01

Discovery

Map workflows, data and outcomes; define a focused first build.

PHASE 02

MVP & pilot

Build, integrate and run a human-reviewed pilot.

PHASE 03

Scale & support

Roll out, monitor and improve with ongoing support.

Let's discuss your project.

AI-assisted. Human-reviewed. Built to not fail.
