INSIDE THIS BROCHURE

About Kanban Studios · What we do · Core services · How we work · Why Kanban Studios · Use cases · Contact

Turn data into forecasts that drive better decisions.

Real-time visibility and smart detection at scale.

Automate processes with control, audit and security.

AI assistants that understand context and get things done.

Kanban Studios

ABOUT KANBAN STUDIOS

Practical business-first AI, built in the UAE.

Kanban Studios is a UAE-based software and AI company focused on building practical business systems, automation workflows and intelligent tools that help organisations operate better. We design and deliver custom AI solutions, internal platforms, process automation systems and secure digital workflows tailored to real business environments.

What we build

Custom AI software, automation systems, dashboards, internal tools, portals and secure business platforms.

Who we work with

Operators in construction, logistics, manufacturing, healthcare, education, government-related and other real operational environments.

Where we are based

Abu Dhabi, United Arab Emirates — designed, reviewed and supported locally.

How we think

Practical AI, reviewed by people where it matters — built to not fail.

OUR PROMISE

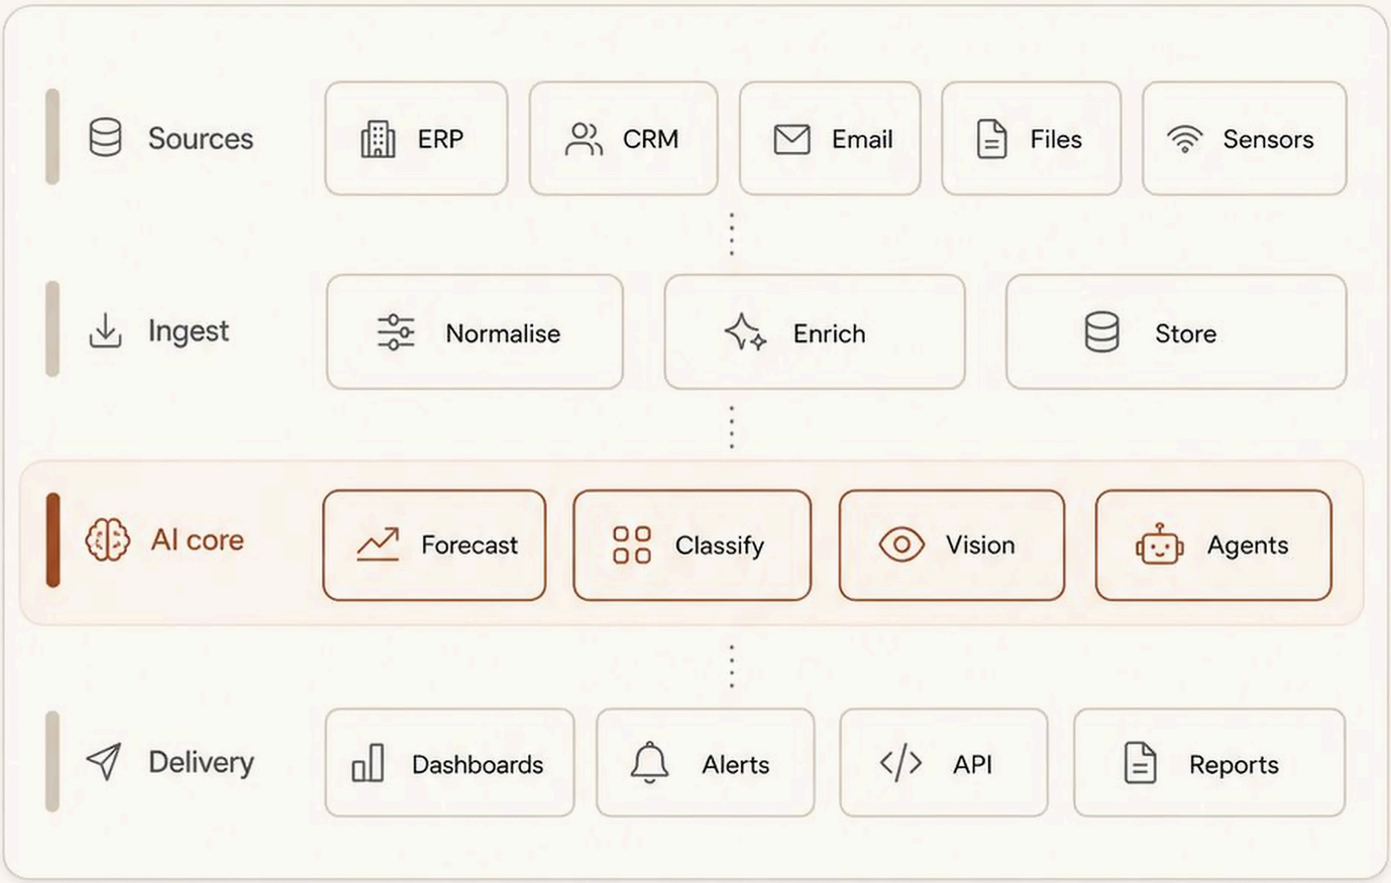

We build tools that fit the way your business actually works.

Kanban Studios

WHAT WE DO

One studio, the whole system

We connect your existing systems to a secure AI core and deliver the tools your team uses every day — dashboards, automations, assistants, reviewed by people where it matters.

- Custom AI tools
- Automation systems
- Dashboards
- Business software
- Internal AI tools
- Integrations
- Secure deployment
- Human-in-the-loop

Guardrails · Security · Logging on every system

Analytics & forecasting

Predictive Analytics — Forecasts with confidence ranges, not false certainty.

Demand forecasting · Lead scoring · Risk scoring · Resource planning · Confidence ranges

Machine Learning — Patterns and models that improve as your data grows.

Scoring models · Recommendations · Churn prediction · Anomaly detection · Operational forecasting

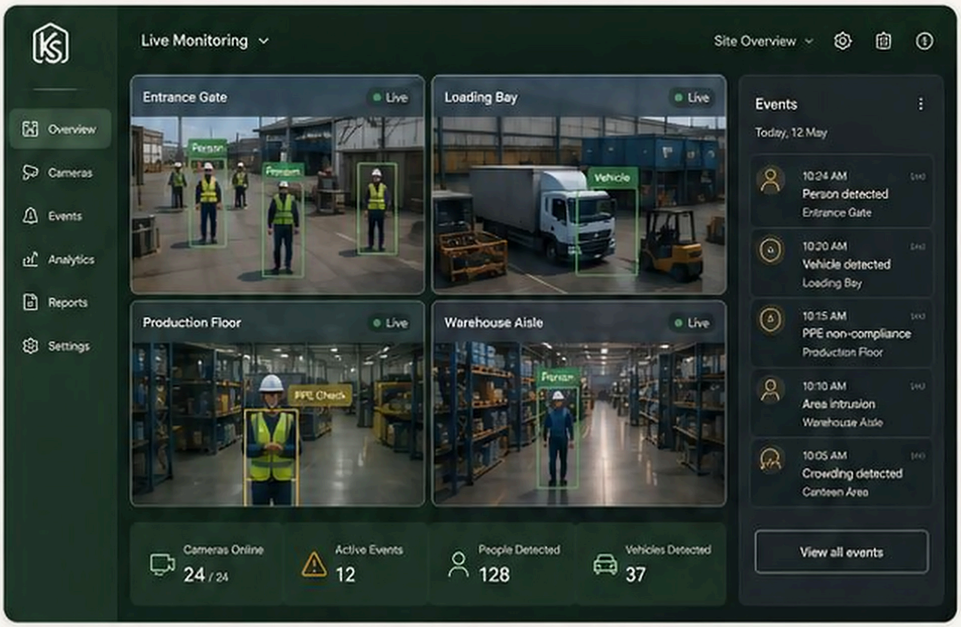

CORE SERVICES · 02

Vision & operations intelligence.

Vision Intelligence

See operational events from existing cameras and visual feeds.

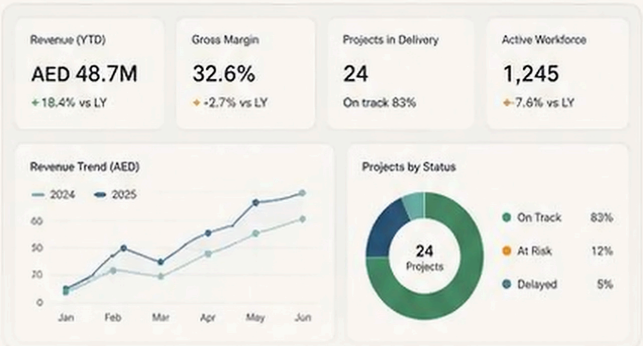

Applications can include person detection, vehicle detection, PPE and safety monitoring, site activity monitoring, visual inspection, defect identification and occupancy monitoring.

Person detection · Vehicle detection · PPE monitoring · Site activity · Defect identification · Human verification

Dashboards & Data Intelligence

Executive, sales, finance, operations, project-delivery and workforce dashboards that turn fragmented data into clear decisions.

KPI tracking · Trend analysis · Alerts · Scheduled reports · Spreadsheet modernisation

CRM & Business Operations Systems

Custom platforms that centralise customer records, pipelines, quotations, approvals, onboarding, service delivery and management visibility.

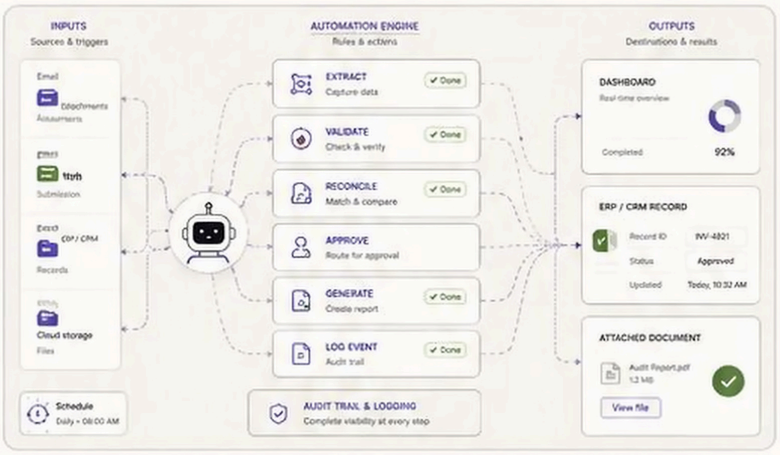

Lead pipelines · Proposal tracking · Task management · Role-based access · Audit trails

CORE SERVICES · 03

Automation, documents & agent systems.

Workflow Automation & RPA

Automate repetitive work while keeping people accountable for exceptions and important decisions.

- Data entry
- Approval routing
- Reconciliation
- Report generation
- CRM updates
- Audit logging

Document Intelligence

Extract, review, summarise, classify and route information from business documents.

- PDF summarisation
- Invoice & quotation processing
- Contract information extraction
- Document comparison
- Compliance checks
- Human verification

Agentic AI and Multi-Agent Systems

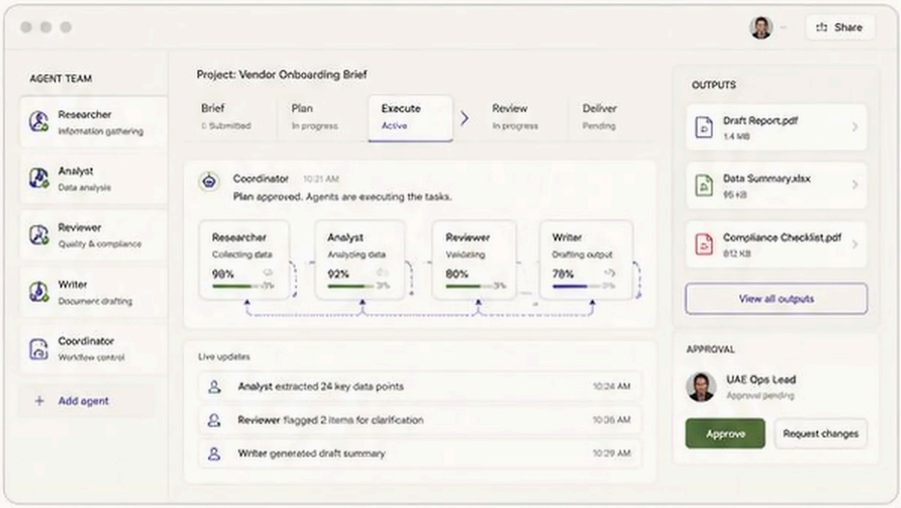

We build systems where specialised AI agents collaborate on complex tasks while remaining visible and controllable by users.

- Workflow orchestration
- Usage monitoring
- Agent handoffs
- Knowledge access
- Human approvals
- Document production

Kanban Agents

Kanban Agents is our browser-based no-code multi-agent workspace.

Users can design AI teams, assign specialist roles, submit a brief, observe agents collaborating, review outputs, and approve final work.

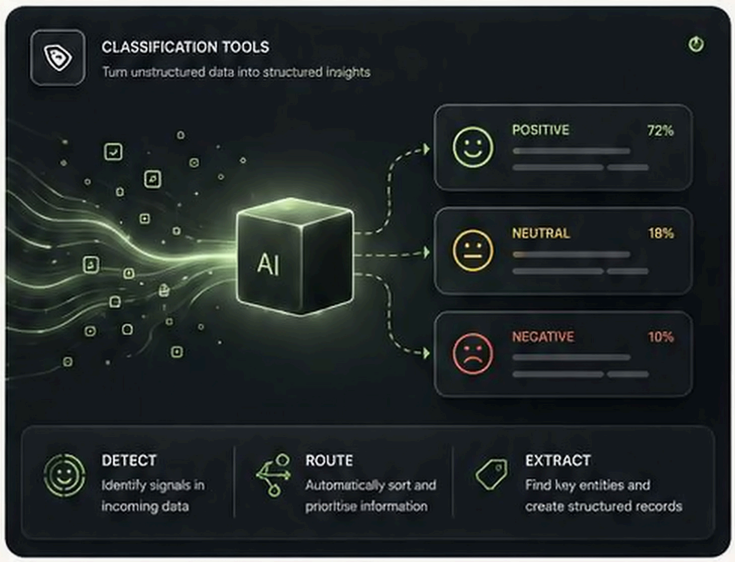

CORE SERVICES · 04

Understanding, conversation & integration.

Classification & Information Routing

Turn unstructured information into structured and actionable data.

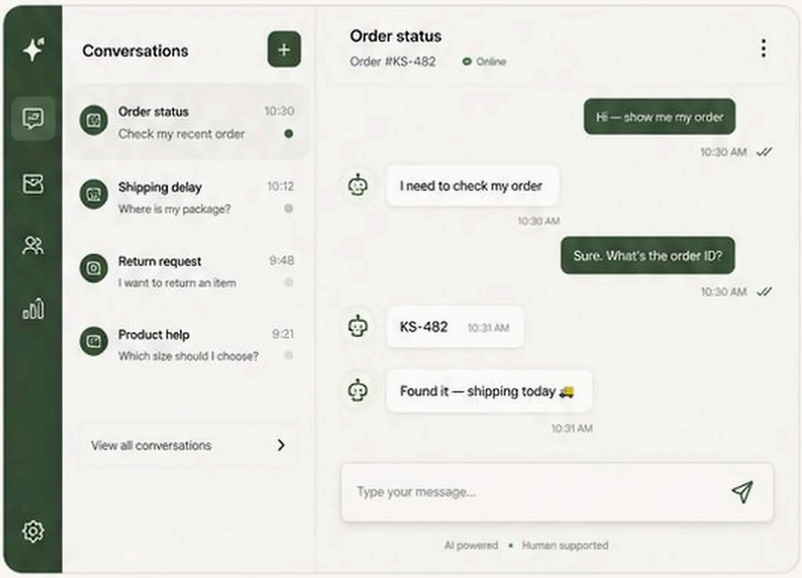

- Sentiment classification
- Intent recognition
- Document categorisation
- Priority routing
- Entity extraction
- Record creation

Conversational AI

AI-powered assistants that answer questions, keep context and hand over to people when needed.

- Customer support
- Internal assistants
- Knowledge assistants
- Bilingual Arabic-English
- Status queries
- Human handover

Systems Integration

We connect workflows through REST APIs, webhooks, Google Workspace, Gmail, Google Drive, Microsoft services, databases, spreadsheets, forms, email systems and messaging platforms.

Integrations remain subject to the provider's access, licensing, privacy and usage rules.

HOW WE WORK

From idea to working system

A clear, repeatable delivery path. We integrate into what you already run, and every gate that carries accountability has a human review step.

01 Discovery
Map your workflows, data and outcomes.

02 Scoping
Define a focused, high-value first build.

03 Design
Solution architecture and interface design.

04 Build
Develop the working MVP, iteratively.

05 Integration
Connect your existing systems and data.

06 Testing
Quality assurance and human review.

07 Deployment
Go live securely, with monitoring in place.

08 Support
Monitor, support and keep improving.

BUSINESS-FIRST · SECURE BY DESIGN · ITERATIVE · HUMAN REVIEW AT EVERY GATE

Product design & prototyping
Discovery, wireframes, UI/UX and MVP planning.

Cloud deployment & architecture
AWS, Cloudflare, hosting, security, logging and monitoring.

AI training, workshops & buildathons
Practical learning in supervised browser-based environments.

Managed software support
Issue investigation, bug fixes, improvements and review meetings.

WHY KANBAN STUDIOS

Built for operations, not demos.

Custom-built systems
Built around your workflow, not a template.

AI-assisted, human-reviewed
People remain accountable where decisions matter.

Security-conscious
Guardrails, access control, logging and sensible deployment.

Integration-driven
Fits the tools and data sources you already use.

UAE-based delivery
Designed, reviewed and supported locally.

Built to not fail
Practical systems for real day-to-day operations.

Representative solution areas

- AI-powered lead-generation platforms
- Camera-monitoring platforms
- CRM and outreach systems
- Internal knowledge assistants
- Document-processing automation
- Customer-support assistants
- Executive dashboards
- Multi-agent AI workspaces

Industries and client environments

Energy & utilities · Oil & gas · Construction & engineering · Manufacturing · Logistics & warehousing · Facilities management · Healthcare · Education & universities · Government-related · Professional services · Retail & e-commerce · Training & research

Let’s discuss your project.

AI-assisted. Human-reviewed. Built to not fail.
